**Medical Center's Human Resources Department honored**

**FRANKLIN, TENN.** – Williamson Medical Center recently gained regional accolades by winning the 2010 HR Excellence Award, which recognizes organizations with outstanding human resources programs.

The award program is facilitated by the Middle Tennessee Society of Human Resource Management and the Nashville Area Chamber of Commerce, which say Williamson Medical Center earned the honor because it is “a community-focused hospital known for its quality of care, loyal employees and a wide range of wellness services.”

Tim Burton, associate administrator for Human Resources, says the award honors more than the performance of the Human Resources Department at WMC.

“It recognizes our employees and leadership who have an understanding and desire to help our organization meet its mission and goals,” he says. “This award is for the entire staff of Williamson Medical Center and what our employees do each day.”

Middle Tennessee businesses are invited to self-nominate for the honor each year and are evaluated on proficiency in five areas: strategy; management practices; employee education, training and development; performance measurement; and employee well-being and engagement.

To help other companies improve their human resources departments, leaders from Williamson Medical Center will share their best human resource practices with other companies during a fall workshop.

Williamson Medical Center, a 185-bed hospital fully accredited by The Joint Commission, provides comprehensive inpatient and outpatient care including emergency services, with credentialed physicians in 53 specialties and sub-specialties. The community-focused hospital

offers a wide range of wellness services, screenings and classes. For more information about Williamson Medical Center, visit [www.williamsonmedicalcenter.org](http://www.williamsonmedicalcenter.org).
